

# HELPING YOUR CHILDREN PROTECT THEIR PERSONAL DATA ONLINE

## What is Personal Data?

Personal data refers to data, whether true or not, about an individual who can be identified from that data; or from that data and other information to which the organisation has or is likely to have access.

Source: PDPC website

Some examples are: includes full name, date and year of birth, contact number, home address, medical conditions, identification number, geographical position (for example, the location data tracked on a mobile phone) and Internet Protocol (IP) address.

It can also include data that can be processed to learn, record or decide something about an identifiable individual. Some examples are daily routines of an individual such as frequent hangouts and online browsing habits. These can be used to compromise the user's personal safety or privacy.

## Why is it a Concern?

Data may be misused by third parties for:

- Illegal online activities such as phishing, scams, identity theft and influence of personal opinion
- Tracking a person which may lead to crimes such as kidnapping and burglary
- Financial gain

## How can Parents Help?

Parents can help their children to safeguard their personal data by:

- ✓ Modelling and guiding responsible and respectful use of social media, e.g., think before posting information about children.
- ✓ Discussing with children their personal data practices such as the need to be mindful about posting personal data and the dangers of sharing information.
- ✓ Reminding children about setting strong and unique passwords, and reviewing privacy and location-finding settings on devices and social media accounts.
- ✓ Teaching children to reduce their digital footprints, e.g., asking friends not to post or tag photos of them without permission.

## Key Messages

Teach children to reduce their digital footprints

Model responsible and respectful use of social media

Set family guidelines to safeguard personal data

Remind children to adjust privacy and location-finding settings
